WHAT WE NEED NOW

Positions, Roles & Infrastructure Needs

The JAG Global Ecosystem is assembling its founding team. After 13 years of architectural planning, documented work totaling 317,000+ words across 10 books, and a comprehensive blueprint for 19 interconnected spheres — the mission is ready to launch. Below are the positions, roles, and infrastructure needs required to bring it to life. Click any position for the full description document.

#	POSITION / NEED	DESCRIPTION
01	Point of Contact	The Founder's personal support person and mission gateway. Protects the Founder's energy, manages his time, filters communications, and ensures he can focus on the work only he can do. Part guardian, part gatekeeper, part daily anchor.
02	Chief of Staff	Primary operational leader. Translates the Founder's vision into execution — manages projects, timelines, team members, budgets, and cross-entity coordination. Runs the organization so the Founder can create.
03	Investor Relations	Manages all fundraising: GoFundMe for stabilization, Kickstarter/Indiegogo for book series, Patreon for ongoing support, and institutional seed rounds ($2.5M target). Handles donor relations, investor outreach, and campaign storytelling.
04	Administrative & Paperwork	Handles business registrations, entity filings, document management, password systems, and the administrative backlog of 13 years of architectural planning. Builds the organizational foundation everything sits on.
05	Business & Legal Advisor	Guides corporate formation across multiple entities (Corporation, Foundation, Trust), intellectual property protection (trademarks, copyrights, patents), contracts, compliance, and the legal architecture of a 19-sphere ecosystem.
06	Technology Lead	Builds and maintains all digital infrastructure: websites (WordPress), automation (Make.com), AI integrations (Claude API, ElevenLabs), Genesis Ledger blockchain system, e-commerce, hosting, and publishing technology. The technical backbone.
07	Communications Expert	Shapes the public voice of the JAG Universe. Develops strategic messaging, manages media and press relations, writes official communications, and implements the "front door strategy" — leading with evidence before deeper claims.
08	Social Media Expert	The digital voice across Instagram, Facebook, X/Twitter, LinkedIn, YouTube, and TikTok. Creates and schedules content, builds community, manages analytics, and translates 317,000+ words of manuscripts into compelling, shareable posts.
09	Documentarian	Captures the mission as it unfolds — video, audio, photography. Produces documentary content, records the Founder's voice for audiobooks and AI training, and builds the visual archive of a story 13 years in the making.
10	Book Editing & Formatting	Edits and formats the 10-book JAG Series for print, ebook, and audiobook. Handles developmental editing, copyediting, typesetting, special characters (Sanskrit, sacred geometry), and publishing platform preparation (KDP, IngramSpark).
11	Human Resources & Planning	Builds the people infrastructure: volunteer recruitment and onboarding, team hiring plans, organizational culture, workforce planning from 1 person to 85+ by 2027, and the systems that support mission-aligned growth.
12	Documenting & Timestamping	Catalogs and blockchain-anchors all original IP through the Genesis Ledger. Generates SHA-256 hashes, builds Merkle Trees, anchors to Polygon/Ethereum, and creates the irrefutable proof that "Copies Cannot Generate."
13	Accommodations & Command Center	Critical infrastructure need: stable living space and personal workspace for the Founder. Computer, internet, microphone, quiet environment. The minimum requirements to activate 13 years of preparation.
14	Health & Nutrition Advisor	Personalized health, nutrition, and wellness support for the Founder. Meal planning, restoration from burnout, movement guidance, sleep optimization, and accountability. The mission cannot succeed without the architect.

15	Headquarters & Technology	Organizational facility and enterprise systems: office space, workstations, servers, networking, production studio, and the full software stack. Phased from startup HQ (2026) through data center and Beacon Campus (2029+).

COMPENSATION & STRUCTURE

All founding team positions offer equity participation in JAG Global Corporation and founding team status. Initial compensation may be volunteer, equity-based, or project-based depending on role and funding stage. Post-funding (seed round: $2.5M target), all positions transition to competitive salaries with performance bonuses.

HOW TO GET INVOLVED

- Apply for a role: Send your background and why this mission resonates to jag132013@gmail.com
- Donate equipment, space, or services: Any contribution to infrastructure accelerates the launch
- Invest: For seed round information, request the Investor & Partner Package
- Share: Forward this document to someone who might be the right fit
