ACCOMMODATIONS & COMMAND CENTER

Living Space, Technology Hardware & Mission Operations Base

JAG Global Network • Position Description • February 2026

PURPOSE OF THIS NEED

This is not a traditional position — it is a critical infrastructure need. The Founder requires stable living accommodations and a properly equipped command center to operate the ecosystem. After 13 years of building the architecture, the current living situation is unsustainable and actively undermining the mission.

The command center concept combines living space with operational workspace: a place where the Founder can live, create, and operate the ecosystem with the necessary technology, connectivity, and environment to do the work.

WHAT IS NEEDED

1. Living Accommodations

- Stable, safe, clean living space (even if temporary)
- Reliable internet connection (essential for all ecosystem operations)
- Quiet environment conducive to writing, recording, and creative work
- Kitchen access for health and nutrition restoration
- Ideally in or near Minnesota, though location is flexible

2. Technology / Hardware

- Computer system capable of running multiple applications, video calls, and content production
- Quality microphone for voice recording (audiobooks, AI voice training, podcasts)
- Webcam and lighting for video content and virtual meetings
- External monitor(s) for productivity and multi-platform management
- Printer/scanner for document management and legal paperwork

3. Software & Subscriptions

- Notion (mission control and project management)
- Make.com (automation platform)
- Claude API access (AI intelligence layer)
- ElevenLabs (voice synthesis)
- Buffer, ConvertKit, Canva Pro, and other operational tools
- WordPress hosting and domain management

4. Accessories & Supplies

- Basic office supplies and organizational materials

- Ergonomic workspace setup (chair, desk)
- Backup power/UPS for system reliability

HOW YOU CAN HELP

- Offer or help locate temporary or permanent housing
- Donate or loan technology hardware (computer, microphone, monitors)
- Sponsor software subscriptions or hosting costs
- Provide workspace or office access
- Contribute financially through GoFundMe to support accommodations and equipment
- Connect the Founder with resources, housing contacts, or equipment donors

WHY THIS MATTERS

Everything in the ecosystem — the books, the programs, the technology, the community, the proof systems — flows through the Founder. Without a stable base of operations and the tools to do the work, the entire 24-portal launch sequence is at risk.

This is the most immediate, tangible need. A computer, a place to live, and an internet connection are the minimum requirements to activate 13 years of preparation.
